

Protective Gear & Equipment

All of our engineers will wear protective gear, including masks, gloves and shoe covers, and will be using hand sanitiser and antibacterial equipment.

Masks: To prevent transfer of virus via nose and mouth

Gloves: To prevent transfer of virus via hands

Tool Box: All tools are sanitised before and after every job

Hand Sanitiser & Antibacterial Equipment:
AC units will be sanitised before and after installation, and so will the working area

Shoe Covers: Installers will cover shoes before entering the property to prevent transmission via shoes
